

Grub

Setting the default runlevel in Ubuntu 16.04

Mapping between runlevels and systemd targets

Runlevel / Target

0: poweroff.target
1: rescue.target
2, 3, 4: multi-user.target
5: graphical.target
6: reboot.target

To change runlevel:

```
sudo systemctl isolate multi-user.target
```

To set the default runlevel:

```
sudo systemctl enable multi-user.target  
sudo systemctl set-default multi-user.target
```

Adding Operating Systems to Linux grub bootloader

Open a new terminal

Execute the following commands:

```
sudo os-prober #this will search for the OSs  
sudo update-grub #this will update your grub bootloader
```
